

ADDITIONAL INFORMATION – MINIMUM MATH EQUIVALENCY DEFINED

Must have satisfactorily (with a passing grade of “C” or better) completed one year of high school algebra or its equivalency.

Equivalent courses are defined as: one (1) full year of high school Geometry, Algebra II, Trigonometry, or Calculus that are satisfactorily completed with a passing grade of “C”, or one (1) post high school Algebra, Geometry, Algebra II, Trigonometry, Calculus course with a passing grade of “C”.

To qualify as an equivalent, each course is required to be satisfactorily completed in its entirety, and each course will be considered separately.

If your transcripts list math classes other than Algebra, but you feel they are an equivalent course (i.e. Math 1, Math 2, Core Math 1, Integrated Math, etc.), **YOU** must provide a letter from the school stating the classes taken were an equivalent to Algebra.

Successful completion of the Interactive ModuMath Algebra course (available through the Wisconsin Technical College System) is approved as an equivalent to the minimum math requirement.

Successful completion of the Online NJATC Tech Math course (www.electricaltrainingalliance.org/Learning/OnlineTechMath), is also approved as an equivalent to the minimum math requirement.
